

D-Zymes Plus

Synergistic formula to support optimal digestion

Special formula to support optimal digestion, D-Zymes Plus combines betaine hydrochloride (HCl) along with a comprehensive, synergistic blend of enzymes that are vital for the digestion of proteins, fats, and carbohydrates.

The importance of healthy digestion

- Sustained energy
- Robust immunity
- Healthy skin and strong nails
- Bowel regularity
- Balanced moods
- Reproductive health

Digestion can be weakened for many reasons. Our busy modern lives are a recipe for suboptimal digestion. The “fight or flight” mechanism that gets us through everyday stressful situations prevents the “rest and digest” mode from doing its job. Feeling worried, anxious, or simply eating too quickly can lead to occasional insufficient stomach acid production. In addition, the production of our own digestive enzymes naturally declines 1% every three years after age thirty. Therefore, it is understandable why so many people benefit from enzyme supplementation for optimal digestion and assimilation of nutrients from food.

Signs that you may benefit from digestive enzymes include:

- Occasional bloating and gas, particularly after eating
- Feeling full after only eating a small quantity of food
- Infrequent mild indigestion/heartburn (components of undigested food bubbles back up into the esophagus)
- Bowel irregularities such as occasional diarrhea and/or constipation

Highlights

Betaine hydrochloride (HCl) – an excellent source of hydrochloric acid, also known as stomach acid. Betaine HCl helps to support proper stomach acidity, as adequate HCl is necessary to begin the breakdown of proteins, and to trigger the secretion of enzymes that help digest fats, carbohydrates and proteins

Proprietary blend of digestive enzymes includes:

- *Dipeptidyl peptidase IV (DPPIV)* – a special enzyme which aids in the breakdown of gluten and casein (hard-to-digest proteins)
- *Lactase* – the enzyme which helps digest lactose, known as the “milk sugar”
- *Ox bile extract and lipase* – to emulsify and digest fats and fat-soluble vitamins

Recommended Use:

As a dietary supplement, take one capsule per day with a meal, or as directed by your health care practitioner.
